

It is only in the last year that courses in Computer Science could be used to satisfy the University Core Requirement in Mathematics. At present only one course in our program, Computer Science CSCI 100, and its Honors variant, CSCI 100H, can be used for this purpose. In the Fall semester of 2019, CSCI 100 and CSCI 100H, one part of a new pair of Enduring Questions courses, will be taught by the Computer Science department, nothing quite like this has been offered in the Computer Science department before. This accounts for the somewhat provisional nature of several of the responses below, especially where CSCI 100 is concerned.

What specific sets of skills and knowledge does the department expect students completing its Core courses to have acquired?

For CSCI 100, a specific set of outcomes has been developed by the group of instructors teaching the

Other than GPA, what data/evidence is used to determine whether students have achieved the stated outcomes for the Core requirement? What evidence and analytical approaches do you use to assess which of the student learning outcomes
