Early in the spring semester, there was a Winterfest event that featured food, fire pits, and outdoor games, and a Turks and CaiStokes event provided students with a spring-break-type event. Additional initiatives planned for the spring semester include:

Equinox – an event similar to Winterfest, looking toward the spring equinox, which will feature a senior-week type atmosphere for students

For first-year students, spaces equipped with games can be reserved in O'Connell House for groups of up to six students to gather

Baldwin's Backyard will begin in April and will provide outdoor gathering spaces

BC After Dark will transform Hillside café and the adjacent plaza into a sports bar type atmosphere for students who are 21+

Tom discussed the ongoing concern for student gatherings and violations to the student code of conduct. Most of the violations have been due to large gatherings. There has been consistent messaging to students about their responsibilities and consequences for violations.

A council member requested a formal system to inform faculty about racial incidents on campus, noting that faculty sometimes hear about incidents from students during class. A council member added that improved communication would allow faculty to make better use of resources available to them in preparing for conversations with students.

Mike acknowledged the need to disseminate information in a timely manner, and this is a topic of ongoing conversations.

A council member asked for increased communication to graduate students around commencement and options for in-person programming for the end of the academic year.

Mike responded that larger scale events will depend on the vaccine rollout and the state limitations on gathering sizes. Additional correspondence around plans for the end of the semester will be coming soon. Tom added that Student Affairs is aware of the graduate student specific concerns and is working with Carole Hughes on them.

Mike then introduced Melinda Stoops, Associate Vice President for Student Health and W

Early May: Student Accounts. Note: Student Accounts has already launched but continues to integrate with UIS, and will switch to full integration with Eagle Apps in May.

Late May/June: Registration for the fall semester

Summer: Degree Audit, Grading, and Transcripts

Summer: The first class graduating out of Eagle Apps will occur.

Mary continued, discussing the summer registration timeline. Eagle Apps will provide students an opportunity to plan their schedules via a course-planning module that will be available to them before the registration period opens. Registration for the various schools will be spread out in April to allow for the best possible support to students and trouble-shooting, as necessary. Registration for the fall semester has been pushed back to late May and June to allow for additional planning to accommodate a higher volume of students registering. Advising will happen prior to students leaving campus, with registration happening after Commencement. Pandemic conditions have led many peer schools to take a similar approach.

Jen Mack provided some background on the work thus far. Course Management and Course Offerings were deployed in mid-December and since then, there have been 18 additional deployments to production with new features, functions, and bug fixes. A support module was implemented which utilizes the BC Works ticket system. There have been 17 group-training sessions attended by over 300 staff members, and over 80 one-on-one training sessions. An Eagle Apps curriculum has been developed in Canvas with 19 training videos currently available across different subject areas. Eventually, every module will have a Canvas training component as well as quick snippet help videos that link from within the application.
